We guarantee this puppy is purebred and will be registered with the CKC. We guarantee that all vaccinations and dewormings have been given as stated on the vaccination schedule (shown on the puppy's passport).

Mandatory 48-Hour Vet Check

This puppy is checked by our veterinarian at approximately 8 weeks of age. We request that the buyer have this puppy examined by a licensed veterinarian of their choice within 48 hours of taking possession of the puppy. If the puppy is found to have a life-threatening hereditary congenital defect or major health problem at this exam, a replacement puppy of equal value will be given, provided the breeder is notified within 24 hours of the exam and the puppy is returned to the breeder along with its CKC registration papers and a signed statement from the examining veterinarian. The breeder is not responsible for veterinary bills incurred by the buyer.

This guarantee does not include uneven bites, injuries, fleas, mites, ringworm, kennel cough, hernias, coccidia, giardia or other intestinal parasites, or demodex, as these are common in puppies. The breeder is not responsible for Parvo, Distemper, or Coronavirus, as these are highly contagious and may be contracted after leaving the breeder. Your puppy has been started on a vaccination and deworming program; please continue this with your veterinarian at your 48-hour visit. Subsequent vaccinations are usually due at 12 and 16 weeks, and rabies after 16 weeks.

Three-Year Congenital Health Guarantee

This puppy is guaranteed for three years from its date of birth against life-threatening congenital defects (including life-threatening aortic stenosis, cardiomyopathy, and hip or elbow dysplasia) as confirmed by a licensed veterinarian. Should such a defect be found within that time, the breeder will replace the puppy with another of the same quality and price, subject to availability. The purchaser must provide, at their own expense, a written statement from a licensed veterinarian; the breeder reserves the right to request a second opinion from our veterinarian or a mutually agreeable alternate. The buyer is responsible for all veterinary and medical bills incurred. Death, injury, or loss of the dog due to theft, carelessness, recklessness, abuse, neglect, heat stroke, or accident does not entitle the buyer to compensation from the breeder.

Showing & Breeding

Show and breeding-prospect puppies are sold on co-ownership or with a non-breeding contract in place. The breeder does not guarantee that the puppy will achieve a title or be suitable for breeding once full grown; not every conformational or fertility issue can be foreseen at 8 weeks of age. Sold on private contract.

Pups Sold on a Pet Contract

The buyer agrees to have a female puppy spayed before 8 months of age, or a male puppy neutered before 14 months of age. Proof of the procedure must be supplied to the breeder within one week of completion. Once received, the breeder will transfer the puppy's CKC registration into the buyer's name. If the buyer does not wish to alter the puppy, this must be discussed with the breeder before placement; in that case registration remains in a co-ownership format or solely in the breeder's name, or a CKC non-breeding agreement will be signed by both parties.

Agreement of Care

The buyer agrees to properly feed, house, and care for this dog indoors as its primary housing (boxers are short-coated and cannot tolerate cold Alberta winters outdoors), to keep vaccinations current, to control the dog on leash in public, and to provide a securely fenced outdoor area. The buyer agrees to give the dog proper physical and emotional care at all times. If the dog is found running at large, creating a public nuisance, or living in neglected or abusive conditions, the breeder reserves the right to repossess the dog with no refund or replacement to the buyer.

Deposits on Upcoming Litters

Deposits are placed in order of receipt. Once a litter is whelped, the breeder will contact each buyer for their pick, in deposit order. If the litter does not produce a puppy satisfactory to the buyer, the deposit is fully transferable to a future litter. The breeder evaluates each puppy at 49 days of age (once neurologically complete) to help match temperament to the right family, and always reserves first and/or second pick of the litter.

If the buyer is ever unable to keep this dog, for any reason, the dog is returned directly to the breeder at no cost to the breeder. There is never a reason for one of our puppies to end up in a shelter or rescue. This contract is valid only for the original purchaser and is not transferable. We love hearing how our puppies are doing in their new homes!
